

Arthur Troop SCHOLARSHIP

My Name is Filippo Ciroi and I work in the Local Police of Udine in the north-east of Italy, this year I was very lucky because I'm one of the winners of the Arthur Troop Scholarship offered each year from IPA in memory of the founder.

I received the notification from the International Secretary just a few days before my birthday and this was a double gift for me; after that I evaluated the best opportunities for training, and I submitted to the International Commission a cost estimate for the course "Analysis and reconstruction of road accidents" held by the University of Pavia and Cirss (Interdepartmental Centre for Studies and research on road safety).

During the time from June to September, I participated with a group of 21 people at the training given by the engineer Mattia Sillo one of the most technical experts on the reconstruction of road traffic accidents in Italy and Europe.

The course which was attended by experts from various European and National Police forces and more IPA members, along with surveyors and engineers, allowed me to acquire skills that will certainly help me in the service by improving the quality of my work.

Furthermore, the course has given me many ideas for the thesis of a degree in mechanical engineering.

From the human point of view I had the privilege of meeting wonderful people.

Thank you very Much IPA!!!
